01 — ASTROLOGY

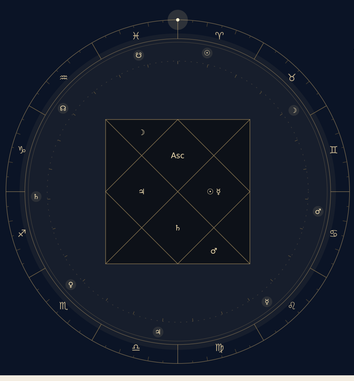

Astrology

Patterns across time

The study of planetary patterns, cycles and timing — practised through classical Vedic methods, KP precision, Lal Kitab and specialised techniques such as Prashna and Muhurta.

ASK AN ASTROLOGY QUESTION

EXPLORE SYSTEMS

WHAT ASTROLOGY OBSERVES

Planets, places and time.

Planets

The nine grahas and their strengths, placements and relationships.

Signs & houses

Twelve rashis and twelve bhavas — where and in which area of life.

Time

Dashas and transits — when patterns are indicated to unfold.

SYSTEMS WITHIN ASTROLOGY

QUESTIONS OFTEN BROUGHT TO ASTROLOGY

- When are the stronger periods for marriage? →
- What does the analysis indicate about career change? →
- Is the present period supportive for starting a business? →
- When is a supportive time to buy property? →
- My birth time may be inaccurate — can it be verified? →
- Which timing suits a launch or agreement? →

CAN AND CANNOT

What astrology can and cannot establish

- It can describe tendencies, periods and timing as classical texts interpret them.
- It cannot establish medical, legal or financial certainties.
- It does not replace professional advice or your own judgement.
- Different systems may read the same chart differently; we say so when they do.

INFORMATION REQUIRED

What we will ask you for

- Date of birth
- Time of birth (or an approximate window + life events)
- Place of birth — we record coordinates and historical timezone
- For Prashna: only your question; for Muhurta: event, date range, location

Bring your question to the chart.

EOPAR recommends the right astrological method for you.

ASTROLOGY & MARKET CYCLES

Where the heavens *meet the markets.*

EOPAR studies how planetary cycles — ingresses, retrogrades, eclipses and lunar phases — line up with market history, sector moves and timing.

SUN TRANSIT • MOON TRANSIT • MARS TRANSIT • MERCURY TRANSIT • JUPITER TRANSIT • VENUS TRANSIT • SATURN TRANS

RESEARCH AREAS

Four ways we study the sky against the market.

01

Market Cycle Studies

Long planetary cycles — Jupiter, Saturn, the nodes — mapped against decades of index history.

02

Eclipses & Volatility

Whether eclipse windows and lunar nodes align with volatile phases, and how often they do not.

03

Planets & Sectors

Traditional rulerships — Mars and metals, Venus and luxury, Mercury and communication — examined.

04

Muhurta for Business

Supportive timing for launches, listings, agreements and openings.

OUR METHOD

Rigour before conclusions.

01

Define the cycle

Name the planetary event precisely: ingress, station, eclipse, aspect.

02

Map against history

Lay the cycle over long index and sector data, not a handful of examples.

03

Record the misses

Every study lists where the pattern failed, not only where it held.

04

Publish with labels

Each finding carries a status: note, hypothesis or observed pattern.

Observation ≠ evidence ≠ conclusion

ABOUT EOPAR

Not a person. *A pursuit.*

EOPAR was created as a space for the study, practice and exploration of predictive arts and related knowledge traditions — from the birth chart to the market cycle.

WHY EOPAR EXISTS

Predictive traditions are often studied in isolation.

Astrology, numerology, palmistry and Vastu each developed their own language. Few places study them side by side, with the same care for sources and the same honesty about limits.

EOPAR brings them together — and extends the same discipline to newer questions, such as how planetary cycles relate to markets.

HOW WE APPROACH KNOWLEDGE

Study the system → Understand its principles → Observe patterns → Compare where appropriate → Apply responsibly

OUR PRINCIPLES

01
Observation first
We describe before we conclude.

02
Honest limits
We say what a method cannot establish.

03
No fear, no pressure
No frightening predictions, no forced remedies.

04
Privacy
Your chart and questions stay yours.

05
Classical grounding
We cite the texts we rely on.

06
No market tips
Market work is research, never trading calls.

Our method

Every consultation follows the same path: study the system, understand its principles, observe the patterns, compare where appropriate, and apply responsibly. When systems disagree, we say so.

What prediction can and cannot do

Predictive analysis describes tendencies and timing as traditions interpret them. It cannot establish medical, legal or financial certainties and does not replace professional advice.

Ethical approach

No fear-based predictions. No pressure to buy remedies. No claims of guaranteed outcomes. We decline questions we cannot answer responsibly.

Remedies

Remedial traditions are presented as traditional practice in their cultural context — never as a condition of service or a guaranteed fix.

Market research

Market content is research and education only. EOPAR does not give buy, sell or hold recommendations, price targets or trading calls.

Privacy

Birth details and uploads are encrypted, used only for your analysis, and deleted on request.
